

PYTHON - SE - BACKEND

SOFTWARE ENGINEERING – MODULE 5

Introduction to Web Technologies - HTML and CSS

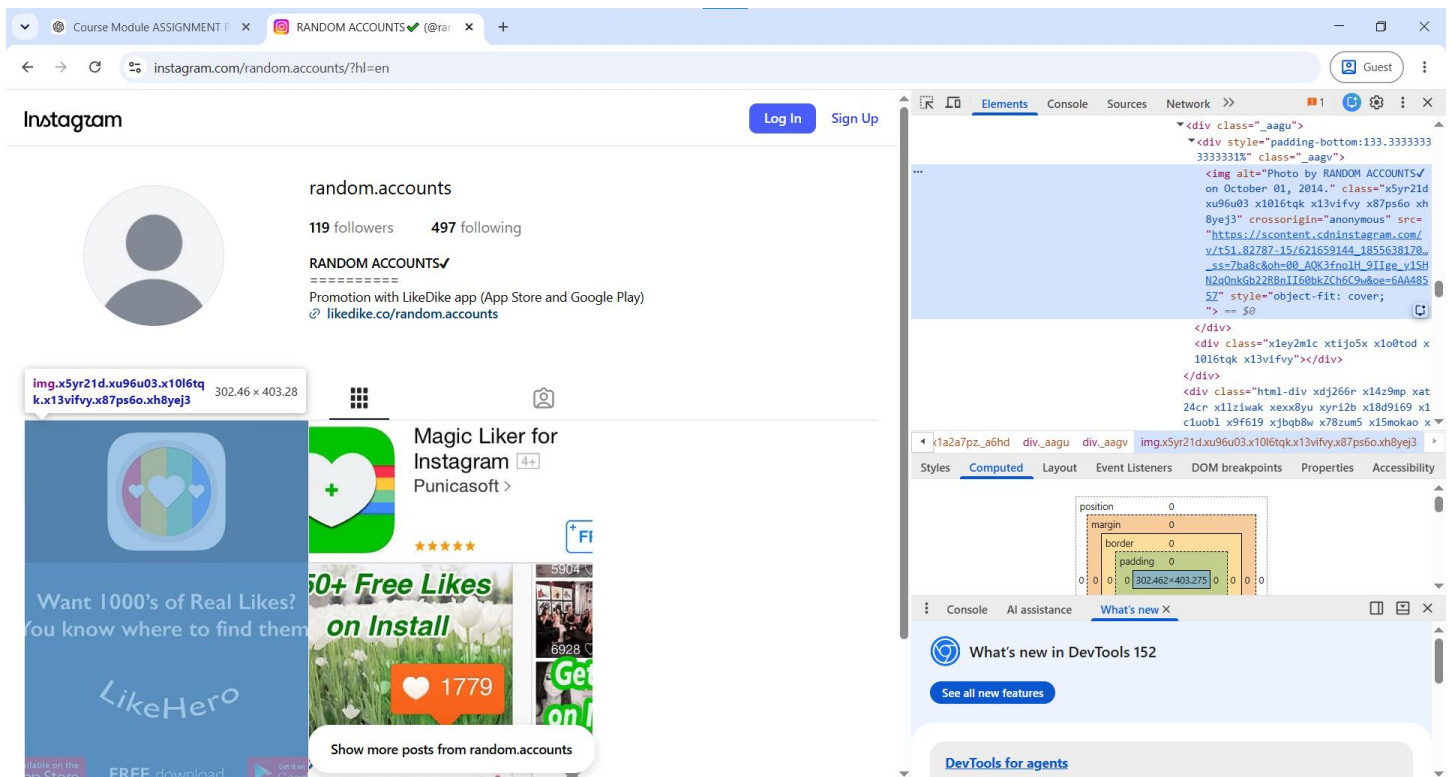

SESSION / ASSIGNMENT – 1

TASKS :

1. Open Instagram's home page in Chrome, right-click on a post image, and use Inspect Element to find the exact HTML tag and CSS class used for the image container. Write down the tag name and class.

➔ Tag : `<img>`

Class Name: `"x5yr21d xu96u03 x10l6tqk x13vifvy x87ps6o xh8yej3"`

2. Create a simple HTML file named myprofile.html that displays your name, a short bio, and a profile picture using appropriate HTML tags (h1, p, img). Open it in your browser and view the result.

➔ CODE:

```
<!DOCTYPE html>
<html>
<head>
  <title>My Profile</title>
</head>

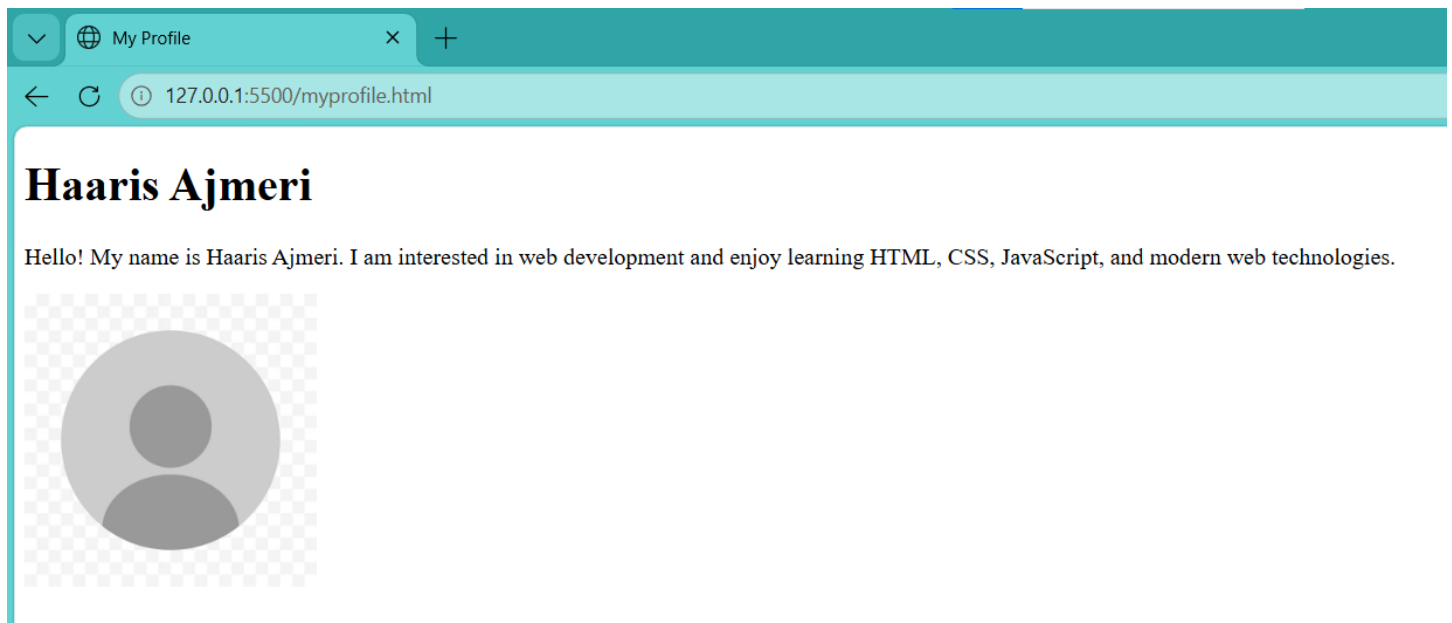

<body>

  <h1>Haaris Ajmeri</h1>

  <p>
    Hello! My name is Haaris Ajmeri. I am interested in web development
    and enjoy learning HTML, CSS, JavaScript, and modern web technologies.
  </p>

</body>
</html>
```

3. Use Chrome DevTools to change the background color of your name (in myprofile.html) to any color you like, live in the browser, without editing the HTML file.

4. Draw a diagram or write a list showing the DOM structure (parent-child relationships) of your myprofile.html page. Include at least 3 levels (html > body > your content).
